

# Snow Removal Survey

In this newsletter you will find a flyer on how we do snow removal. Council is willing to consider several possible measures that would allow us to do snow removal even faster, if residents are willing to pay more or put up with some inconvenience. Please take a few minutes to let us know your views.

1. With additional hiring and extra equipment, we could reduce the time for major snow removal operations from an average of 5 working days to just under 4 working days. The extra taxes for the average homeowner would be \$140 annually. Are you in favor of this proposal?  Yes  No
2. A big problem that we have in Hampstead is the fact that most homeowners hire contractors to remove driveway snow. This snow is put on the street and that adds significantly to the time it takes to remove all the snow. On the west island, contractors use snow blower attachments and put driveway snow on lawns rather than on the street. We can force contractors to do that in Hampstead but residents should expect contractors to raise their fees. Should we do this?  Yes  No
3. We could institute alternate side parking on most streets in the town during weekdays. This would speed up operations, as the crews would not have to wait for cars to be moved. However, on 2 or 3 days, each week, there would be no parking in front of your home. If we did this all year, street sweeping would also be improved. Are you in favor?  Yes, Winter only.  Yes, all year.  No

Do you have any other suggestions or comments?
